DriverPass
System Analysis
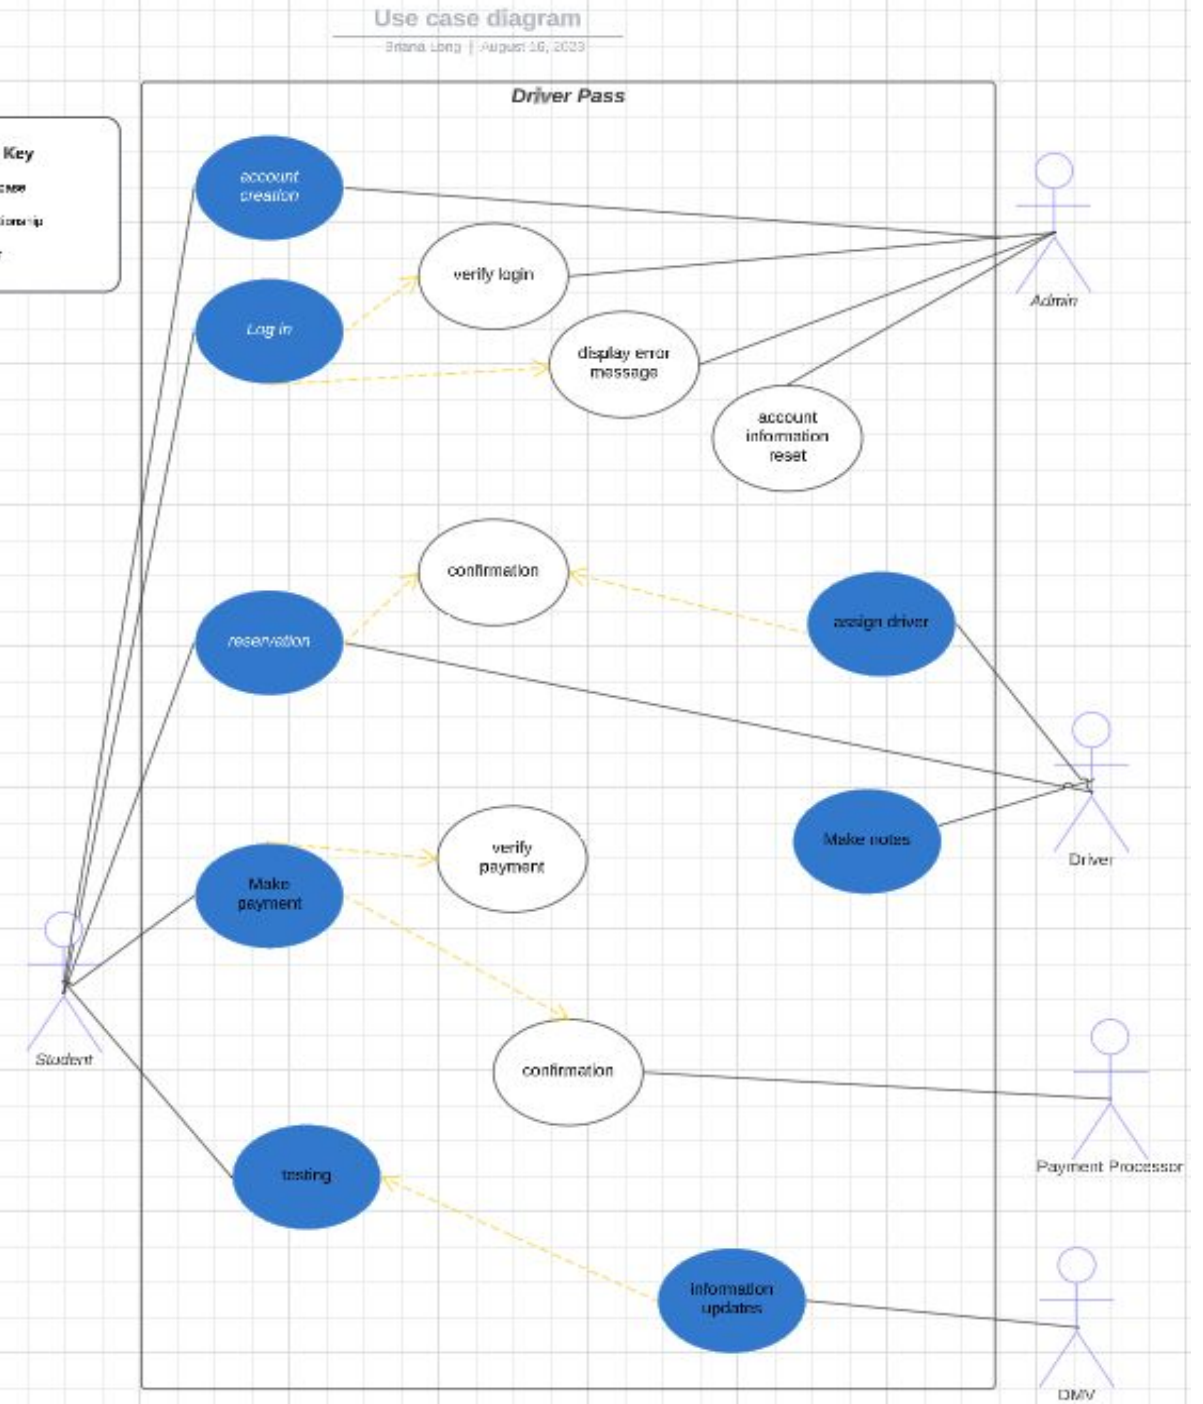

Briana Long

System Requirements
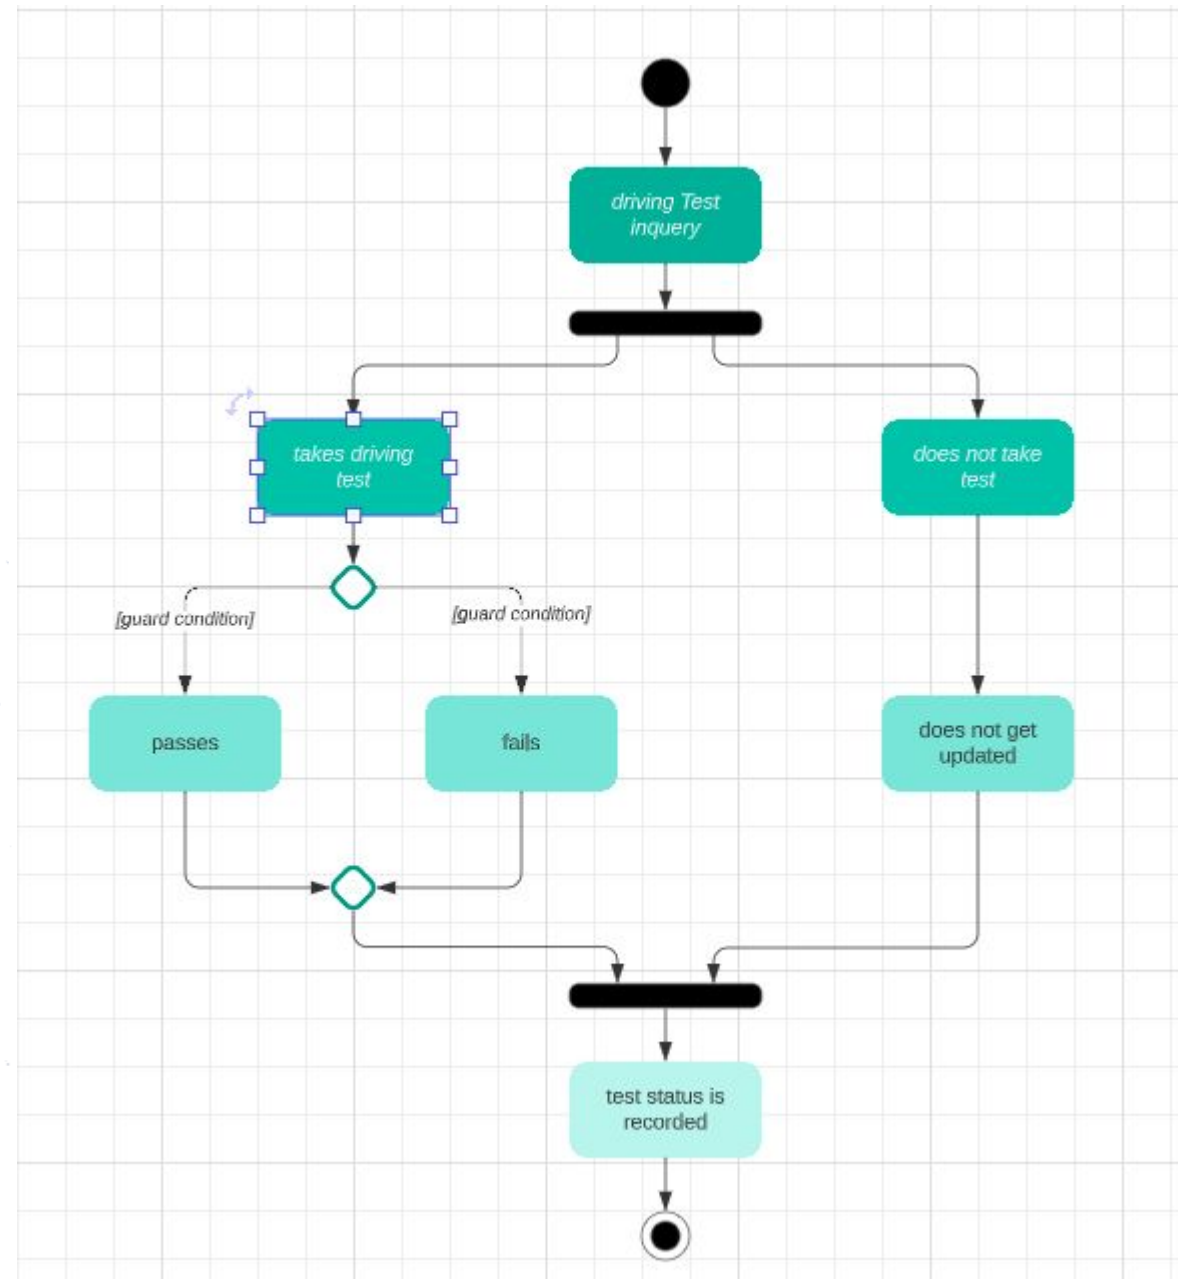

Functional
- The system

Nonfunctional
- The system should be accessible both online and offline.
- The system should be able to store and update all of the users data.

Use Case Diagram

Activity Diagram

Security

- The system will safely secure all data.
- When there are failed login attempts, an admin is notified.
- The system will allow different users to have access to certain parts of the application.
- Admins are the only user's that can change login information.
- Payment processing information will be secure.

System Limitations

- The system may overbook on cars or lessons.
- The system has a large design scope.
